

Improving the Learning Environment: FLOORING SELECTION

Improving the Learning Environment: Flooring Selection is a comprehensive and objective overview of the science that accurately describes the relationship between flooring and acoustic performance, health, comfort and safety in learning environments and the impact they can have on teachers and students.

IDCEC (HSW), AIA and EDAC accredited

LEARNING OBJECTIVES

- + Understand how flooring impacts acoustics, IAQ, safety and comfort in schools.
- + Assess acoustic, IAQ, safety and comfort properties of different floor coverings.
- + Identify ways that environmental factors can impact student performance.
- + Explain to others the importance of considering these environmental factors when specifying flooring.
