

J+J SUSTAINABILITY
AN OVERVIEW OF LEED V4 FOR CARPET AND KINETEX

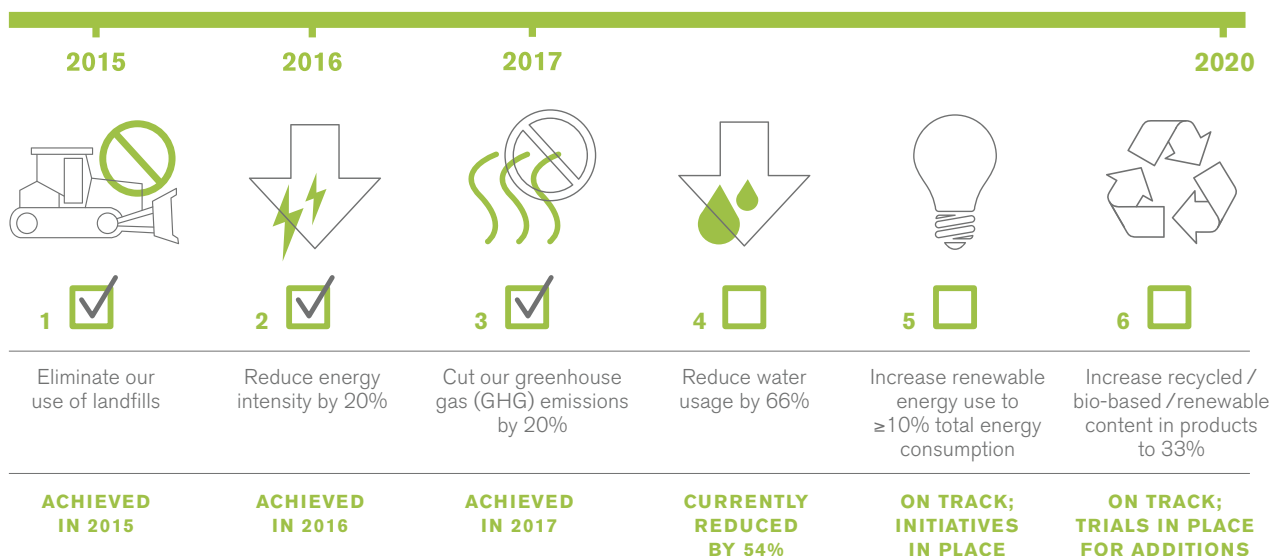

Caring for Tomorrow Today

We keep our sustainability priorities simple: conserve the resources we use, responsibly source the materials we need, and minimize the social and environmental effects of our operations and our products. We take a multi-attribute approach and use third-party verified Life Cycle Assessment data based on ISO standards and category rules. We have also embedded a set of key environmental performance goals for the year 2020 into our operations. Called our 20/20 Vision, there are six critical targets we are working to achieve by the year 2020.

- + J+J Flooring Group is proud to be the first and only flooring manufacturer to achieve third-party Zero Waste to Landfill Certification.
- + Focused on transparency with EPDs and HPDs available
- + NSF 140 Certified Products
- + Manufactured in ISO 14001:2015 Certified Facilities
- + Green Power Partner

20/20 Vision
