*Textile Composite Flooring*

---

Kinetex is an advanced textile composite flooring that combines key attributes of soft-surface floor covering with the long-wearing performance characteristics of hard-surface flooring. Created as a unique alternative to hard surface products, J+J Flooring's Kinetex has an unprecedented range of performance attributes for education, corporate, public space and healthcare environments.

## 1 » Durability

---

Kinetex delivers enduring performance, year after year, and is backed by a lifetime warranty. One of the most thoroughly tested flooring products on the market, it has outstanding dimensional stability and unparalleled crush resistance—and has withstood more than 5 million foot traffic events. Over 100 million square feet of Kinetex have been installed worldwide,

## Life Cycle Costs: Installation & Maintenance

## 3 » Moisture Tolerance

---

The most common subfloor, concrete, can permit excessive moisture to pass through and destroy floor covering systems—unless costly precautions are taken before installation. But moisture mitigation isn't necessary with Kinetex; its breathable nature allows moisture to pass through its backing, instead of trapping it underneath. Kinetex textile composite flooring will perform in elevated RH slabs up to 100%.

# Mitigate No More

# Easy Breathing

## Airborne Allergens and Irritants

Foot Traffic Dust Emissions Test  
(ESO Fine Test Dust 12103–142)

## 5 » Safety

---

Kinetex is the only wall-to-wall textile floor covering certified as High-Traction by the National Floor Safety Institute. Its innovative construction creates one of the most slip-resistant flooring surfaces ever tested—wet or dry—to prevent falls before they happen. And with a unique low profile, Kinetex has minimal rolling resistance, potentially reducing injuries from pushing and pulling.

# Gaining Traction

Coefficient of Friction

\*wet soapy surfaces

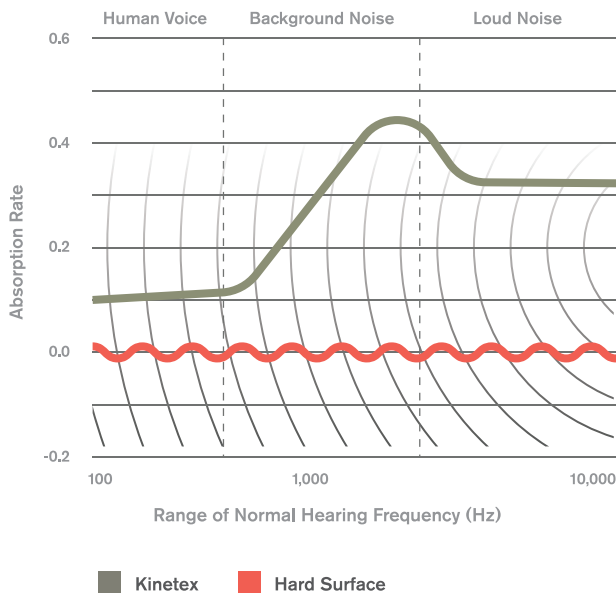

## 6 » Acoustics

---

Kinetex delivers unparalleled acoustic performance, with one of the highest Noise Reduction Coefficients (NRC) and Impact Insulation Classifications (IIC) of any commercial flooring product. The result: a dramatic reduction in both airborne and structure-borne noise, allowing for greater voice recognition, fewer mistakes, less vocal strain, enhanced learning and improved occupant perception.

# Keeping Quiet

Source: Conducted by an Independent Testing Laboratory

# Step-By-Step Support

Source: Conducted by an Independent Testing Laboratory

## 8 » Sustainability

---

Made with 45% post-consumer recycled content, each Kinetex tile contains the equivalent of 27 used water bottles. This dematerialized flooring product and its longer life mean that Kinetex has a much smaller environmental footprint than other commercial flooring options. Kinetex is NSF/ANSI-140 Platinum certified (the industry-leading standard for sustainability) and has a Red List Free DECLARE label and EPD available. Furthermore, Kinetex has been verified as a Carbon Neutral product.

## Second Chances

each Kinetex tile contains the equivalent  
of 27 plastic water bottles

# Where to use Kinetex

## **Healthcare:**

Acute care hospitals, medical office buildings, urgent care clinics, outpatient surgery centers, outpatient physical therapy/rehab centers, outpatient imaging centers, etc.

## **Education:**

Early childhood development centers, preschool, k-12, higher education

## **Retail/Mercantile:**

Wholesale/retail merchants

## **Hospitality:**

Hotels, restaurants

## **Commercial Offices:**

Offices, call centers

## **Transportation/Public Venues:**

Airports, bus/train stations, performing arts centers, athletic arenas, conference centers
