Downtown

kinetex
24”x24” MODULAR
The essence of Downtown is articulated through a layered linear texture and subtle pattern striations that mimic the silhouette of architecture in the heart of a city. The blended linear motif paired with eye-catching color movement create a seamless installation across the room.
COORDINATES
Beyond the beauty of individual products, our flooring coordinates effortlessly across all of our product platforms - modular carpet tile, broadloom, LVT and Kinetex textile composite flooring. This offering enables you to blend a range of designs with tonal simplicity to create palettes that reflect the demands of each unique space.

Kinetex delivers enduring performance, year after year. One of the most thoroughly tested flooring products on the market, it has an outstanding dimensional stability and unparalleled crush resistance.

Kinetex has withstood more than 5 million foot traffic events.

1. DURABILITY
Kinetex minimizes air particulates that trigger allergies and cause infection. It easily surpasses California’s 01350 requirements—the most popular U.S. standard for evaluating and restricting VOC emissions indoors.

2. MAINTENANCE
Tough to wear out, easy to maintain. With vacuuming and encapsulation cleaning, Kinetex looks like new, year after year.

3. MOISTURE TOLERANCE
The most common subfloor, concrete, can release excessive moisture and destroy floor covering systems—unless costly precautions are taken before installation. But moisture mitigation isn’t necessary with Kinetex; its breathable nature allows moisture to pass through its backing, instead of trapping it underneath. Kinetex textile composite flooring will perform in elevated RH slabs up to 100%.

4. HEALTH
Kinetex delivers unparalleled acoustic performance, with one of the highest Noise Reduction Coefficients (NRC) and Impact Insulation Classifications (IIC) ratings of any commercial flooring product.

5. SAFETY
Kinetex is the only wall-to-wall textile floor covering certified as High-Traction by the National Floor Safety Institute. Its innovative construction creates one of the most slip-resistant flooring surfaces ever tested—wet or dry—to prevent falls before they happen.

6. ACOUSTICS
Kinetex minimizes air particulates that trigger allergies and cause infection. It easily surpasses California’s 01350 requirements—the most popular U.S. standard for evaluating and restricting VOC emissions indoors.

7. COMFORT
Kinetex has the potential to reduce repetitive foot stress injuries and other injuries related to standing and frequent movement from place to place.

8. SUSTAINABILITY
Made with 45% post-consumer recycled content, each Kinetex tile contains the equivalent of 27 plastic water bottles. This dematerialized flooring product and its longer life mean that Kinetex has a much smaller environmental footprint than other commercial flooring options. Furthermore, Kinetex is NSF/ANSI-140 Platinum certified (the industry-leading standard for sustainability) and has a Red List Free DECLARE label.
WARRANTIES

We stand behind every aspect of Kinetex and extend certain lifetime warranties. Each warranty is covered for the useful life of the product, provided that installation and maintenance is in accordance with J+J Flooring’s Kinetex Installation instructions.

ENVIRONMENTAL ATTRIBUTES

| RECYCLED CONTENT | 45% post-consumer |
| LEED SCORECARD | IEO 4.1 and IEO 4.3 |
| NSF/ANSI 140 CERTIFICATION | platinum |

TESTING

| FLOORING RADIANT PANEL | class 1 |
| SMOKE DENSITY | less than 650 (flaming & non-flaming) |
| ELECTROSTATIC PROPENSITY | less than 3.0 kv |
| COLORFASTNESS TO LIGHT | rating of 4.0 or greater |
| COLORFASTNESS TO CROCKING | rating of 4.0 or greater |
| WATER REPELLENCY | rating of 4.0 or greater |
| APPEARANCE RETENTION | 4.0 or greater |
| SLIP RESISTANCE | Complies with ADA Guidelines for level surface |
| THERMAL INSULATION | NSF/ANSI Certified High-Traction |
| NOISE REDUCTION COEFFICIENT | 0.73 |
| IMPACT INSULATION CLASSIFICATION | NRC Rating: 0.30** |
| STAIN RESISTANCE | IIC Rating: 64** |
| INDOOR AIR QUALITY CERTIFICATION | CRI Green Label Plus™ |

ADHESIVE

Kinetex adhesive (full-spread pressure-sensitive) [optional] PreFa® pre-applied releasable adhesive

©2020 J+J Flooring Group, LLC - This unique design is protected under the U.S. Copyright Act of 1976. Any unauthorized copying or duplication of this design constitutes copyright infringement in violation of federal law. Due to the unique visual characteristics of modular carpets, pattern repeats and pattern run-off seams may appear more noticeable than in broadloom carpets. Such visual characteristics do not constitute a manufacturing defect, and as such, should be considered when selecting modular carpet and its installation.

These photographs are representations of the installation for this modular product. Your modular installation may look different than these photos depending upon individual tile placement, lighting, and overall space layout, including furnishings. Final tile placement and the resulting visual is thus the customer’s, and not J+J Flooring’s responsibility.

*NRC rating is a measure of the effectiveness of a material in absorbing sound. The higher the NRC rating, the greater the ability of the flooring product to absorb airborne noise. Independent laboratory testing of Kinetex has shown an average NRC rating of 0.30 (bare concrete flooring will typically provide a NRC Rating of 0.15).

**IIC is a rating of the insulation from impact noise. The higher the IIC rating, the greater the sound insulation. Independent laboratory testing of Kinetex has shown an average IIC Rating of 64. Minimum IIC Rating for high-traffic areas is 34. This IIC Rating is for Class 1:one-noise. Test results and testing laboratory will vary, and the above information is not guaranteed.
