Zephyr

INSPIRATION

Forces of Nature depicts the beautiful chaos that results when elements gather and collide to take command of the skies. Zephyr offers an after-the-storm freshness with its muted textural transition of color and pattern. Tempest renders the strong surging movements of a wind storm through its irregular strokes of tone-on-tone color. Cumulus clouds share a story through translucent shape and billowy formations across a backdrop of temperate sky. The Forces of Nature Collection’s 18” x 36” carpet tile palette features 14 colorways in Cumulus and Tempest, with 7 complementing colors in Zephyr.

Due to the unique visual characteristics of modular carpets, pattern repeats and pattern run-off seams may appear more noticeable than in broadloom carpets. Such visual characteristics do not constitute a manufacturing defect, and as such, should be considered when selecting modular carpet and its installation.

These photographs are representations of the installation for this modular product. Your modular installation may look different than these photos depending upon individual tile placement, lighting, and overall space layout, including furnishings.
