editor's note

So it had been years since I'd traveled to the lively metropolis of London when I found myself trekking down the underground stairs to catch the "tube" in order to meet some old friends for a late dinner. Being from the States, I find myself in awe of just how simple mass transit in the bustling city can be. I don't know that I've ever really stressed about how to get from point A to point B.

I think that my ease and confidence in my experiences traveling the "tube" stems from the elementary way that the mapping graphics have been laid out. Instead of having to remember transit line and connection names, all I have to do is remember to take the brown line to the grey line to the red line. Brown, grey, red – it's that easy. Even the non-creatives of the world can relate to and function within a color-coded infrastructure.

If you think about it, without color, the map of the London underground could have ended up as a spaghetti-like index of monochromatic lines and text. But, with a simple infusion of bright color, what was originally intended as a strictly utilitarian diagram of one of the world's busiest transit systems is now a world-renowned icon of the city's active, urban culture.

Color made all of the difference. Whether it's a famous interpretation proudly hanging in the halls of the Tate Gallery or a tattered paper guide haphazardly shoved in my back pocket, the "tube" is a shining example of the impact of chromatic inspiration.

colorful way forward

Index takes on a new direction as it artfully defines and guides through complex spaces; providing necessary details that tell a story of not only color, but also of destination.

The use of color in wayfinding has long been a common practice in signage, but the utilization of directional color within the floor finish is a more subtle and sophisticated approach to address circulation, navigation, and critical work zones.

Index takes this practice and delivers an additional design component that allows for even greater diversity in your quest to create an informative, modular flooring plan. With three neutral bases and sets of four bright accents to uniquely complement each neutral, Index will now allow you to utilize and combine two distinct tile sizes.

Available in either 24" x 24" tiles or our new 12" x 48" demi-plank, color in addition to size can now take your environment into a new and informative direction.

product details

FIBER

Encore® BCF Nylon with ColorLoc® Plus

Encore BCF nylon with ColorLoc Plus is manufactured to offer exceptional color, performance and appearance retention. Carpet using Encore BCF nylon with ColorLoc Plus - our patented stain resistant technology - is engineered to resist permanent staining and is backed by Lifetime Performance Warranties for stain resistance, colorfastness, color transfer, water bleed, bleach resistance and wear.

Encore® SD Ultima® (with recycled content)
Encore SD Ultima is specifically engineered to maximize appearance retention with exceptional color, performance, sustainability and practicality.

BACKINGS

Nexus® Modular

Nexus modular products can be installed in a variety of ways and are performance engineered to be visually appealing. In addition, they are designed to accommodate your long-term flooring budget.

- Manufactured in an ISO 14001:2004 certified facility
- Contains pre-consumer recycled content and contributes to LEED
- Recyclable through the J+J Flooring Group's R4 Carpet Reclamation Program

ADHESIVES

Commercialon® Premium Modular Adhesive

A high strength acrylic latex-based carpet adhesive specifically formulated for bonding modular PVC backed carpet to the floor. This premium adhesive is for use with all Invision Nexus Modular Tile products. This adhesive is guaranteed for the life of the installation when used in accordance with the J+J Flooring Group Carpet Installation Handbook. Commercialon Premium Modular Adhesive meets the CRI Low-VOC Emission Criteria, CRI ID# PSA-425402. Commercialon Premium Modular Adhesive is non toxic, has ultra-low odor and is antimicrobial in the dry state.

TECHNOLOGIES

ProTex® Soil Release

ProTex is a proprietary fluorochemical technology that is applied and bonded to the pile fiber to impede soiling and to improve cleanability. It is standard on all J+J Flooring Group products.

ProTex works similarly to the technology used in nonstick cookware by lowering the surface energy of the fibers which increases soil release properties. Very small soil particles cause carpet to appear dull. Thanks to ProTex, small soil particles are effectively removed by vacuuming or wet cleaning.

*Colors 1832, 1837, 1842 are 100% Encore® SD Ultima®

Due to the unique visual characteristics of modular carpets, pattern repeats and pattern run-off seams may appear more noticeable than in broadloom carpets. Such visual characteristics do not constitute a manufacturing defect, and as such, should be considered when selecting modular carpet and its installation.

These photographs are representations of the installation for this modular product. Your modular installation may look different than these photos depending upon individual tile placement, lighting, and overall space layout, including furnishings. Final tile placement and the resulting visual is thus the customer's, and not J+J Flooring Group's responsibility.

product flexibilities

OPTIONAL BACKINGS

Nexus® Cushion
Nexus Cushion is a cushion backing system for modular products, offering outstanding performance and comfort underfoot.

ALTERNATIVE ADHESIVES

TileTabs®
TileTabs are high tack adhesive tabs that connect carpet tiles together, resulting in a continual layer that gently grips existing flooring. Escape typical trappings with TileTabs for a versatile, glue-free installation solution for modular carpet goods. Just peel, place, & press!

ADDITIONAL TECHNOLOGIES

ProSept® Antimicrobial
ProSept is a unique, broad-spectrum technology applied to the carpet backing system to serve a dual function: to protect the carpet from both bacterial and fungal growth and to eliminate odors associated with molds and fungi.

Sentir® Advanced Odor-Blocking Technology
J+J Flooring Group’s Sentir is a self-renewing treatment designed for the control or elimination of offensive odors associated with various indoor environments, and it is especially beneficial with odor-bearing spills.

Sentir is not a deodorant that masks offensive odors. It is a technology that absorbs and fragments the odor into component parts over a period of time, thus destroying the odor itself. Sentir is not decomposed by this action and is therefore ready to destroy the next odor molecule it encounters. The binding properties of Sentir provide resistance to multiple cleanings and trafficking, ensuring durability.

Green Circle - Zero Waste to Landfill Operations Certification

We are proudly certified as a Zero Waste to Landfill manufacturer by GreenCircle Certified, LLC., a prominent third-party certifier of environmental claims. We are the first commercial flooring manufacturer in the United States to achieve this landfill free status and the first company in the industry to have its waste diversion efforts audited and verified by a recognized, third-party certifier.

Sustainability Progress Report

The J+J Flooring Group Sustainability Progress Report documents our journey toward increased environmental accountability and transparency. Each annual summary provides an update on sustainable advances in product development, resource reduction, certifications and progress toward the company’s 20/20 Vision. To view our most recent Sustainability Progress Report visit www.jjflooringgroup.com/sustainability

Aquafinity®

This industrial water reclamation system uses a blend of filters and reverse osmosis to recover up to 50% of our dyehouse wastewater.

The reuse of wastewater in carpet dyeing is an environmentally innovative process that J+J is proud to pioneer. In fact, we anticipate annually recycling 25 to 27 million gallons of dye house wastewater with the Aquafinity System.

corporate programs

R4®
The R4 (return, reuse, recycle, reduce) program is specifically designed for our customers across the country to facilitate the recycling of all J+J Flooring Group samples and architect folders that are no longer needed. Print your pre-paid UPS return shipping label anytime at jjflooringgroup.com.

The R4 program is available to all customers in the contiguous United States. For customers in Canada, please contact us at 800-241-4586 x8020 or email answers@jj-invision.com for details.

We're on it.
The J+J Flooring Group Premium Customer Experience.

At J+J Flooring Group, you’re not an account. You are a customer, and most of all a person we are privileged to serve. That outlook is fundamental to our business. It’s at the core of our family-owned heritage, and this unwavering personal service is not without its structure and discipline. In fact, we call it our Premium Customer Experience, and it’s a carefully crafted process by which we guarantee that our customers will get the products, services and the reliability they expect from us. We may be a very people-focused company, but those people use a disciplined and developed framework to meet and exceed our customers’ expectations.
