

kinetex

High Performance Flooring for
Transportation Service Environments

what is kinetex

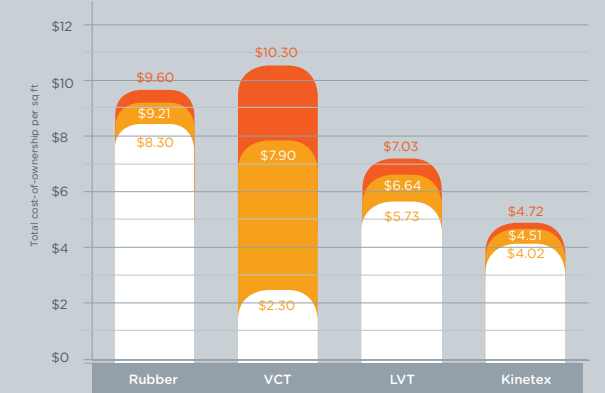

Kinetex® is an advanced textile composite flooring that combines key attributes of soft-surface floor covering with the long-wearing performance characteristics of hard-surface flooring. Created as a unique floor covering alternative to hard-surface products,

J+J Flooring Group's Kinetex encompasses an unprecedented range of performance attributes that render it well-suited for high traffic environments such as those in the transportation industry. In addition to its human-centered qualities and highly functional design, Kinetex offers a reduced environmental footprint compared to traditional hard-surface options.

The key to the high-performance attributes of Kinetex lies within its construction. Each layer, when used together, creates a versatile, lightweight, soft-surface flooring designed with qualities parallel to that of hard-surface.

Cost of Ownership

Category	Rubber	VCT	LVT	Kinetex
10 years maintenance cost / Southeastern US	\$1.30	\$8.00	\$1.30	\$0.70
7 years maintenance cost / Southeastern US	\$0.91	\$5.60	\$0.91	\$0.49
installation & materials cost / Southeastern US	\$8.30	\$2.30	\$5.73	\$4.02

The costs shown reflect average SE United States costs, which may vary depending upon the cost of materials, the cost of installation and the cost of maintenance. The relative costs will remain approximately the same for most geographic locations.

flooring made for the people who use it

Both travelers and transportation personnel spend a lot of time on their feet as they travel from place to place throughout a transportation terminal. Whether walking, running or standing, certain key flooring attributes can help to create an overall positive experience.

Comfort

Kinetex provides exceptional anti-fatigue properties to create a comfortable environment to stand and walk. It also embodies the potential to absorb energy and reduce both repetitive foot stress injuries and injuries related to walking and moving frequently from place to place.

Roller Mobility

Kinetex's unique low profile provides rolling resistance equal to that of hard surface.

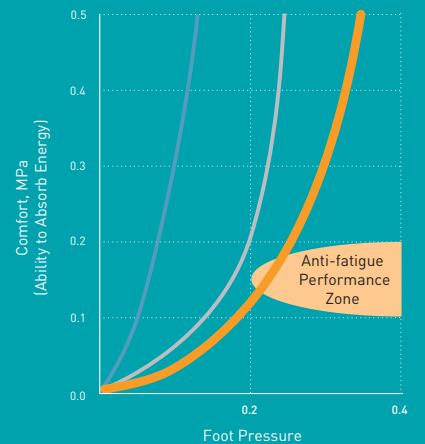

Noise Reduction

Kinetex features one of the highest NRC and IIC rating of any commercial flooring products which reduces vocal strain and enhances voice recognition with conversations and overhead announcements.

Safety

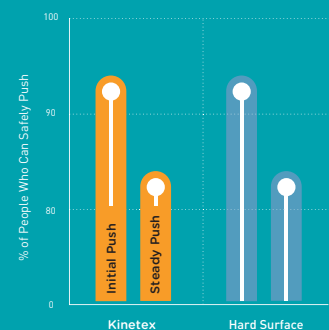

Kinetex's unique construction creates one of the most slip resistant flooring surfaces ever tested, wet or dry — reducing the potential for slip and fall injuries.

flooring made for the people who maintain it

Maintaining your airports' image is a balance between durability, cost and ease of maintenance.

Durability

Kinetex is one of the most thoroughly tested flooring products ever developed. Kinetex is proven to withstand over 5 million foot traffics or over 10 years in a high traffic jetway.

Maintenance

Kinetex cleans easily with vacuuming, encapsulation or hot water extraction. Kinetex dries 75% faster than carpet. Kinetex resists the most challenging staining agents and is easily sanitized.

Sustainability

With more than 55% recycled content, Kinetex is NSF/ANSI 140 Platinum Certified, features a 50% lower environmental impact compared to other commercial floor coverings and is 100% recyclable.

From our establishment in 1957, we have become one of the oldest exclusive manufacturers of *commercial flooring* in the United States. As one of the largest privately held mills, our FAMILY-OWNERSHIP provides a *heritage* of proven performance and expansive industry knowledge. Most importantly, our focus has always been on *people...* ensuring them that our products deliver the highest levels of BEAUTY, PERFORMANCE and DEPENDABILITY.
