J+J FLOORING

In 1985, the flooring company bearing the name of brothers Robert and Bud Shaw became the first carpet manufacturer to break into the Fortune 500. Mr. Shaw retired from that company in 2006, but in 2009 he decided to come out of retirement and founded Engineered Floors, LLC. Instead of using his past success as a model for growth, Mr. Shaw knew that thriving flooring companies only get that way by doing what others haven't done or what they have deemed impossible. He began fresh with Engineered Floors, building from the ground up under the company promise of "Innovation Reinvented." Mr. Shaw instilled a drive to identify and implement new technologies, streamline production, integrate operations under one roof, and guided the development of Engineered Floors' product and market strategies. Today, under Mr. Shaw's leadership, Engineered Floors has quickly grown to be the third largest carpet manufacturer in the United States and the fastest-growing flooring company in the world.

"ENGINEERED FLOORS HAS QUICKLY GROWN TO BE THE THIRD LARGEST CARPET MANUFACTURER IN THE UNITED STATES AND THE FASTEST-GROWING FLOORING COMPANY IN THE WORLD."

J+J Flooring opened its doors in 1957 and was acquired by Engineered Floors in 2016. As a commercial flooring division of Engineered Floors, we are poised to continue delivering on our goal to shape inspiring commercial spaces through resources, technology and product selections. With modular carpet, broadloom, LVT (luxury vinyl tile) and Kinetex, a textile composite flooring – we provide a range of product solutions to meet the needs of our customers.

TILETABS® MODULAR CARPET CONNECTORS | NTAB

J+J Flooring's high-tack TileTabs allow installation and replacement of flooring without the use of spread adhesives. With our TileTabs, simply peel, place and press. They are odorless, glue-VOC-free, and eliminate drying time, making your space available for immediate traffic and occupancy.

STABILITY

TileTabs grip strips provide a low-tack, high-shear boundary layer designed specifically to stabilize the installation and prevent creep in high traffic areas. These are definitely valuable at entry points where TileTabs can be used on J+J Flooring's walk-off modular carpet to make walk-off mats that can be placed over hard surfaces like stone, tile and terrazzo.

MOISTURE

TileTabs can be used on J+J Flooring's Nexus Modular and J+J Flooring's 5mm LVT. When used on our Nexus Modular or our 5mm LVT, with our Commercialon Premium Sealer, it will perform in elevated RH slabs up to 99% and a pH of 11.

DESIGN & COLOR

TileTabs opens up a world of design possibilities like assembling carpet tiles into functional area rugs. With TileTabs, you're not locked into permanent wall-to-wall carpet solutions, but rather free to explore inspiring color and design combinations for a permanent or temporary new look.

ENVIRONMENTAL

With J+J Flooring's TileTabs system less is more: less mess and less waste means a reduced environmental footprint. TileTabs eliminate the need for cumbersome materials and tools like wet adhesive spreads thus eliminating harmful VOCs from the installation process.
