J+J FLOORING GROUP

Kinetex® textile composite flooring is engineered to withstand the demands of high-traffic spaces while offering the comfort and warmth of soft-surface. The performance attributes and construction of this unique flooring render it a better alternative to hard-surface products in most learning-centered spaces.

Textile Composite Flooring

*Flooring Solutions for  
Learning Environments*

## Flooring Made for the People Who Use It

Easily sanitized and easy to maintain, Kinetex is virtually unaffected by common classroom stains. It is proven to withstand more than 5 million foot traffics with minimal wear, and our innovative design resists crushing found in high traffic corridors and classrooms.

- Solution Dyed Polyester Wear Layer
- Durable for extreme-traffic environments
- Easy maintenance and lower cost-of-ownership
- Improved ergonomics and comfort underfoot
- Excellent roller mobility
- One of the most slip-resistant flooring surfaces ever tested
- Superior acoustic performance
- Reduced environmental footprint
- NSF 140 Platinum Certified
- DECLARE label verified with Red List Free designation

## Keeping Quiet

Source: Conducted by an Independent Testing Laboratory

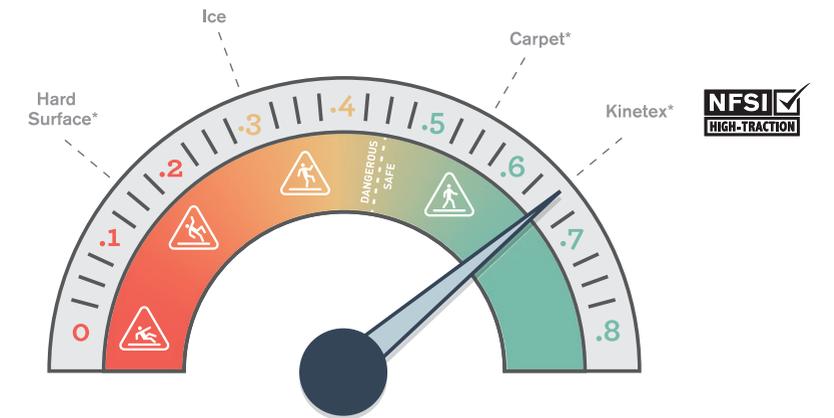

Kinetex delivers unparalleled acoustic performance, with one of the highest Noise Reduction Coefficients (NRC) and Impact Insulation Classifications (IIC) ratings of any commercial flooring product. The result: a dramatic reduction in both airborne and structure-borne noise, allowing for greater voice recognition, fewer mistakes, less vocal strain, enhanced learning and improved occupant perception.

## Gaining Traction

Kinetex is the only wall-to-wall textile floor covering certified as High-Traction by the National Floor Safety Institute. Its innovative construction creates one of the most slip-resistant flooring surfaces ever tested — wet or dry — to prevent falls before they happen.
