

FLOORING ENGINEERED FOR

# Health and Wellness

IN HEALTHCARE ENVIRONMENTS

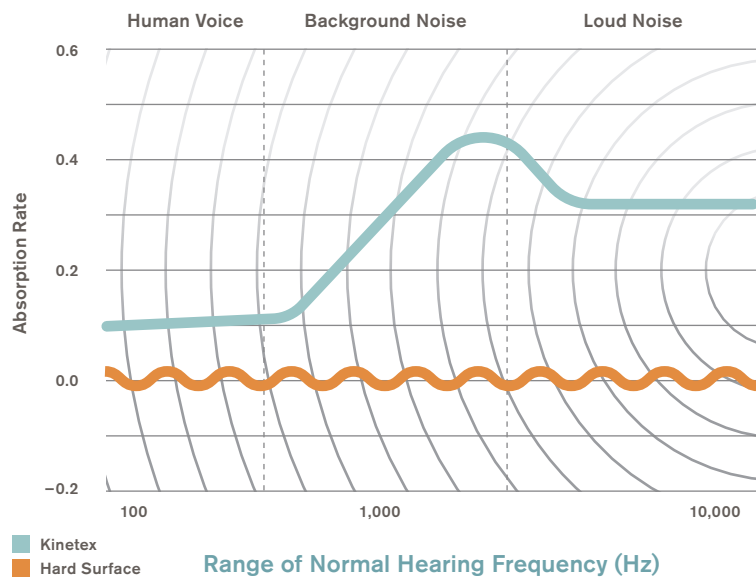

**kinetex**  
*Textile Composite Flooring*

**J+J FLOORING**  
A DIVISION OF ENGINEERED FLOORS

# High noise levels worsen patient and staff outcomes.

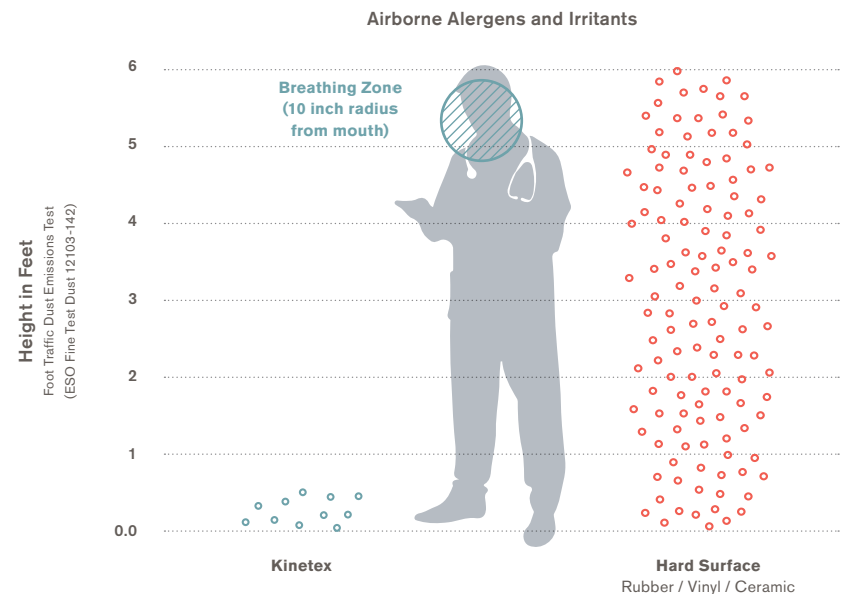

Kinetex delivers unparalleled acoustic performance, with one of the highest Noise Reduction Coefficients (NRC) and Impact Insulation Classifications (IIC) ratings of any commercial flooring product.

# 95% Particulate Retention

Kinetex sequesters airborne particulates that trigger allergies and cause infection 95% better than hard/surface/rubber/vinyl/ceramic.

Kinetex easily surpasses California's 01350 requirements—the most popular U.S. standard for evaluating and restricting VOC emissions indoors.

# 85% of People can Safely Push on Kinetex

Heavy hospital equipment such as hospital beds are hard to push on any surface. Kinetex textile composite flooring has rolling resistance similar to hard surfaces, and the same reduced pushing related injury potential as a hard surface.

KINETEX | PUT A CORK IN IT

# Greater Comfort

Healthcare communities promote movement. Doctors, nurses and staff are working, walking and standing throughout the space. Kinetex has greater potential to absorb energy and reduce repetitive foot stress injuries and other injuries when compared to hard surface. This also creates a more comfortable space for staff who stand for long periods of time. With its thermal insulation properties, Kinetex also provides a warmer indoor environment.

KINETEX | STRATA

# 46%

Of people who fall on hard, shiny surfaces suffer injuries requiring medical attention, compared to 17% of people who fall on soft surfaces.

Kinetex is the only wall-to-wall textile floor covering certified as High-Traction by the National Floor Safety Institute. Its innovative construction creates one of the most slip-resistant flooring surfaces ever tested — wet or dry — to prevent falls before they happen.

# X27

16 oz bottles per Kinetex tile

Kinetex contains more than 45% post-consumer recycled content made from recycled PET commonly sourced from plastic beverage containers. Each box of Kinetex contains the equivalent of 492 plastic bottles and each tile contains the equivalent of 27 bottles.

At the end of its useful life – Kinetex can be recycled into itself as easily as a plastic beverage container.

# made for the demands of healing

For more than 60 years, J+J has manufactured intelligently crafted and beautifully designed commercial flooring. Our rich legacy informs our approach — creating a suite of products to meet the unique challenges of demanding environments.
